What you will do and what you will need

In this flow you will be analyzing some data using least-squares. The flow is a collection of pages and you will be expected to develop the pieces in an external `ipython` notebook (to limit loads on the server). A starting notebook is found here [\(/course/cs357-f15/file-version/59babe8be91b4665456aae2abfdc1e1e732643ec/media/least-squares-cancer/Cancer-Analysis-Starter.ipynb\)](#)
