Cost of Pivoting

1分

Let $A \in \mathbb{R}^{n \times n}$ be a matrix. Suppose we compute the LU factorization using Naive GE and then using GE with Full Pivoting.

What is the additional cost of using Full Pivoting?

选项*

- ☐ $\mathcal{O}(1)$
- ☐ $\mathcal{O}(n)$
- ☐ $\mathcal{O}(n \log n)$
- ☐ $\mathcal{O}(n^2)$
- ☐ $\mathcal{O}(n^3)$
- ☐ None of these
