

# Python Introduction: A few more things

Getting help:

1) Use TAB in IPython

In [1]:

```
a = [1,2,3]
```

In [1]:

2) Using pydoc3 on the command line.

3) Online at <http://docs.python.org/> (<http://docs.python.org/>)

---

## A few things to look up in a quiet moment

String formatting

In [2]:

```
"My name is {0} and I like {1}".format("Andreas", "hiking")
```

Out[2]:

```
'My name is Andreas and I like hiking'
```

---

Dictionaries

In [3]:

```
prices = {"Tesla K40": 5000, "GTX Titan":1400}  
prices["Tesla K40"]
```

Out[3]:

5000
