

```
int strlen(char *string) {  
    int len = 0;  
    while (string[len] != 0) {  
        len ++;  
    }  
    return len;  
}
```

```
int strlen(char *string) {  
    int len = 0;  
    while (*string != 0) {  
        string ++;  
        len ++;  
    }  
    return len;  
}
```
